Data Center Expenses Aren't Going Anywhere

Even as the shift towards cloud computing accelerates, the reality is that data center expenses remain a significant and growing consideration for businesses. Data centers continue to support a large portion of IT operations, particularly for legacy systems that are less adaptable to cloud migration, as well as new Gen AI initiatives where privacy and security are paramount.

Sakon's Data Center Expense Management solution recognizes this enduring need. Our platform ensures businesses can navigate this IT expense with strategic agility.

1 Cost Clarity

Navigate the labyrinth of data center costs. Our platform offers a detailed breakdown of expenses, providing spend transparency in areas such as power, cross connects, racks, servers, and managed services. Ensure every dollar in your data center decision is accounted for.

2 Net Zero Goals

Sakon shows you power consumption, associated costs as well as source of power to guide you on your journey to a net-zero data center. With tools to assess and manage power consumption and space utilization, we ensure sustainability and profitability go hand-in-hand.

3 Contract & Vendor Management

Effortlessly manage multiple data center vendor relationships and contracts through a single pane of glass. Sakon's platform provides end-to-end visibility, from contract initiation to expiration, ensuring you never miss a renewal or overlook a service detail.

4 ESG Compliance Integration

Stay ahead of the curve with environmental, social, and governance (ESG) compliance. Sakon's platform cross-references your data center's energy sources against environmental databases, ensuring your operations meet ESG standards and certifications.

5 Automated Expense Workflows

Leverage Sakon's automated workflows for a comprehensive workflow of your data center expenses. From invoice receipt to payment, our platform simplifies and accelerates the invoice approval and payment process, saving you time and money.

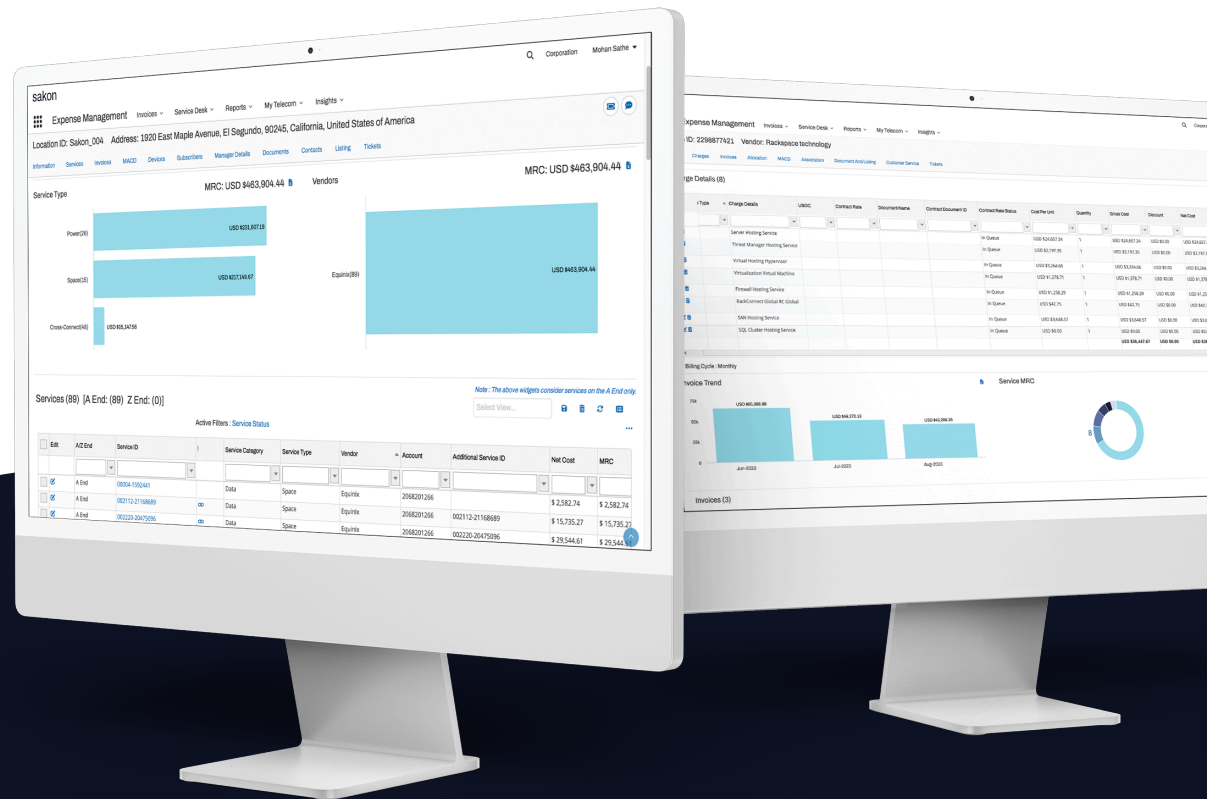

What Can Sakon Do For You?

Sakon helps businesses maximize the value of IT spend on a global scale.

Founded in 2003 and headquartered in Concord, Massachusetts, Sakon has over 1,000 employees with offices in the United States, Canada, the United Kingdom, China, Singapore, and India.
