Gain Control of Telecom Services and End User Devices

Learn how Sakon can help you save time, money, and improve employee experiences.

Telecom Platform

Our telecom platform maximizes the price to performance of your network by optimizing costs, automating workflows and enabling strategic decisions through data insights. Sakon provides a complete business process automation engine tailored to the needs of Network Services, Finance and Procurement.

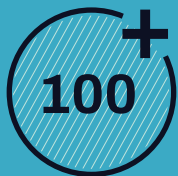

If network sprawl, siloed data, and manual processes have you down, you can get to where you need to be with Sakon.

Device Platform

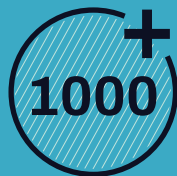

Our device platform enables End User Services teams to power the new hybrid workplace with digital experiences and data management for the mobile lifecycle. Our solutions take the complexities out of managing modern device inventories so consuming devices is easy and simple for all users. Have all required smartphone, tablet and laptop information at your fingertips, in Sakon or in ServiceNow.

This is the platform to manage all your end user devices.
