

Telecom Expense Management (TEM)

At a Glance

Telecom Expense Management, or TEM, makes it possible to automate invoice processing entirely – from invoice receipt, to allocation, to payment. TEM is the process of managing your communication services invoices in order to better understand your total telecom costs, reduce spend and increase efficiency.

As a recognized global leader in Telecom Expense Management, Sakon is well-positioned to empower your businesses to understand, manage and reduce your communications spend across the board.

sakon

Key Benefits

Modernize Invoice Receipt

Automate the collection and validation of global complex telecom and cloud invoices to reduce workload and remove invoice issues.

Eliminate Billing Errors

Leverage industry-leading tech to validate all line items on your invoices, improving accuracy, reducing disputes, and delivering spend reduction.

Streamline Your Invoice Approval Process

Replace your generalized PO-based invoice management system with a purpose-built platform customized to your telecom approval policies and workflows.

Allocate and Chargeback Expenses

Modernize chargeback of telecom expenses with full AP/ERP Integration to all major platforms, enabling your teams to handle complex global taxation and rules.

Improve Visibility and Control

Integrate your enterprise data with vendor data to maintain a real-time understanding of spend across vendors, locations, and business units.

Track Vendor Payments

Gain full visibility on vendor payment methods and status with the invoice details, reducing late fees, service disconnection, and overbilling.

Automate Bill Payment

Consolidate your hundreds of technology payments into a single Sakon payment so you never have to follow up on missed checks, misapplied funds, and other vendor issues. We can pay globally and even extend your vendor payment terms!

The Sakon Solution

Sakon's industry-leading telecom expense management (TEM) makes it possible to empower IT, Finance, and Accounting with a purpose-built AP Invoice Automation service for telecom and cloud services that drives a guaranteed ROI.

For IT and other enterprise decision-makers, Sakon drives significant cost savings and a better understanding of network expenses. Our turnkey solutions make it easier than ever to understand, manage and ultimately transform your network for the better.
